

SYED MUHAMMAD SHANIB BURNEY

Senior Full Stack Engineer

+92 341-2977002 | shanib.burney@gmail.com | LinkedIn: [Shanib Burney](#)

PROFESSIONAL SUMMARY

Results-driven Senior Full Stack Developer with 5+ years of experience building high-performance, cloud-native web applications for SaaS, fintech, and marketplace platforms. Delivers end-to-end across responsive React.js and Redux interfaces and scalable Node.js (NestJS, Express.js, TypeScript) backends, including microservices, REST and GraphQL APIs, and event-driven systems using NATS. Hands-on with Docker, Kubernetes, AWS, PostgreSQL, MongoDB, and Redis. Technical team lead who drives sprint execution, runs design reviews, and mentors engineers to ship quality software on time.

CORE COMPETENCIES

Languages: JavaScript (ES6+), TypeScript

Frontend Development: React.js, Redux, HTML5, CSS3, Bootstrap, Material UI, Next.js

Backend Development: Node.js, NestJS, Express.js, REST APIs, GraphQL, Microservices, NATS, Strapi, Socket.io

Databases: PostgreSQL, MySQL, SQL Server, MongoDB, Redis, Firebase

Cloud & DevOps: Docker, Kubernetes, AWS EC2, AWS S3, CI/CD Pipelines, Linux

Tools & Methodologies: Git, GitHub, JIRA, Agile, Scrum, Kanban

Soft skills: Team Leadership, Architecture Oversight, Task Allocation, Mentorship, Code Review

PROFESSIONAL EXPERIENCE

Senior Software Engineer (Team Lead) | Sunbonn | Mythod

Jul 2022 – Present

- Led full stack development across multiple SaaS projects, owning sprint planning, task allocation, and technical decisions for a team of 6+ frontend and backend developers.
- Architected and deployed a production microservices environment on Kubernetes with NATS message broker and PostgreSQL, Redis, and MongoDB, achieving high availability and horizontal scalability.
- Sped up deployments by 50%+ by building automated CI/CD pipelines that streamlined build, test, and release workflows across staging and production.
- Implemented clustered Redis caching across high-traffic API endpoints, cutting database load by ~45% and improving response times for user-facing applications.
- Drove Agile/Scrum ceremonies including stand-ups, sprint reviews, and retrospectives, consistently hitting sprint completion targets through effective prioritization.
- Conducted technical interviews and design reviews and defined full stack coding standards, improving maintainability and onboarding efficiency.

MERN Stack Developer | ePaging

Feb 2022 – Jul 2022

- Delivered MERN (MongoDB, Express.js, React.js, Node.js) development for an NFT-powered social media platform and blockchain marketplace, including secure wallet authentication and transaction APIs.
- Built RESTful APIs and supporting UI features for NFT minting, trading, and user profiles, handling concurrent requests via optimized queries and caching layers.
- Collaborated in an Agile team to ship features iteratively across the stack, maintaining code quality through peer reviews and testing.

Software Engineer | Teciz

Nov 2020 – Jan 2022

- Delivered full stack solutions across Node.js, Express.js, React.js, and Flutter for client projects spanning HR, hospitality, and fitness verticals.
- Built a MERN-stack Employee & Sales Management System with a React.js frontend featuring real-time dashboards, role-based access control, and SQL Server integration.
- Developed a Gym Management System on Node.js and SQL Server, exposing REST APIs consumed by a Flutter mobile app and a React.js admin panel.
- Contributed full stack development on a SaaS Hotel Management System using Node.js and PostgreSQL, enabling multi-tenant booking and inventory management.

EDUCATION

Master of Science — Data Science <i>NED University of Engineering & Technology, Karachi</i> - COVID-19 Prediction (Binary Classification) — Pandas, Scikit-learn, Seaborn, Logistic Regression, KNN, Decision Tree, Random Forest: Benchmarked four classifiers on patient symptom data using 3-fold stratified cross-validation; visualized feature correlations and per-model precision/recall/F1. - Multimodal Image Captioning Benchmark — PyTorch 2.6, HuggingFace Transformers, Streamlit, CUDA 12: Benchmarked CNN-LSTM, ViT-GPT2, and BLIP on Flickr8k (BLEU scores); CNN-LSTM achieved 6x lower inference latency (39ms vs 250ms) with 3.5x fewer parameters; deployed live Streamlit dashboard for side-by-side caption generation.	2024 – Present
Bachelor of Science — Software Engineering <i>University of Karachi, UBIT CGPA: 3.25 / 4</i>	2018 – 2021
Intermediate in Pre-Engineering <i>Adamjee Govt. Science College 72%</i>	2015 – 2017
Matric in Science <i>Karachi Board 84%</i>	2015

KEY PROJECTS

Fintech Budgeting Application — <i>NestJS · PostgreSQL · Redis · JWT · Banking APIs</i> - Integrated third-party banking APIs for real-time account aggregation and transaction categorization; implemented Redis caching to reduce database load by ~30%. - Designed JWT-based authentication and role-based access control to meet financial data security requirements.
Travel & Ticket Management System — SaaS — <i>NestJS · Microservices · PostgreSQL · NATS · Docker · Kubernetes</i> - Architected a multi-service NestJS backend with NATS event-driven communication, reducing inter-service coupling and improving system resilience. - Deployed on Kubernetes with Docker containers, supporting zero-downtime deployments and efficient resource utilization.
NFT Social Media & Marketplace Platform — <i>React.js · Node.js · Express.js · MongoDB · Blockchain APIs</i> - Built a full stack platform with an Express.js backend for NFT minting, peer-to-peer trading, and social feed features; optimized MongoDB schemas with indexing to reduce query latency significantly. - Integrated external blockchain APIs for wallet verification and on-chain transaction validation.
Employee & Sales Management System — <i>React.js · Node.js · Express.js · SQL Server</i> - Developed a comprehensive full stack ERP-style system with a React.js frontend, covering employee management, sales tracking, and reporting for a mid-sized fertilizer company. - Implemented complex SQL Server query optimizations to support real-time analytics dashboards with large datasets.
Gym Management System — <i>React.js · Flutter · Node.js · SQL Server · REST APIs</i> - Designed and developed RESTful APIs serving a Flutter mobile app and a React.js admin panel for member management, attendance tracking, and billing automation. - Implemented automated membership renewal workflows and payment tracking, reducing manual administrative overhead.
Hotel Management System — SaaS — <i>Node.js · PostgreSQL · REST APIs</i> - Built a multi-tenant Node.js backend for a SaaS hotel management platform, supporting booking, room inventory, and guest management across multiple properties. - Designed a normalized PostgreSQL schema with optimized queries to support concurrent multi-property operations.
